^{*}This file describes version v0.2, last revised 2021/08/04.

1 Purpose of this package

This package is made for the HSR Studenten organization to provide an easy to use interface to give a more consistent look and feel for the works produced by its the members. A secondary objective of this package is to eliminate the *many* dispersed duplicate .tex files that fill the repositories of the HSR-Stud org.

2 Package Options

dontrenew Do not renew existing LATEX commands and environments. This is useful when the package is loaded on a document that is already partially written.

arrowvec Tells the package to use a vector notation with a small arrow over the variables, as it were handwritten.

textvecdiff Disables the "Nabla" or "Del" notation for vector derivatives. Instead the symbols $\nabla, \nabla \cdot, \nabla \times, \nabla^2, \nabla^2$ are be replaced with grad, div, curl and div grad.

3 Summary notation

4 Default Theming

4.1 Links with hyperref

```
Colors from [1] see

https://intranet.hsr.ch

1 Colors from
2 \cite{bib:hsrcolors} see \\
3 \url{https://intranet.hsr.ch}
```

4.2 Source Code with listings

```
1 int main(int argc, char *argv[], char *envp[]) {
2    std::cout << "hello world" << std::endl;
3 }

1 \begin{lstlisting}[language=C++]
2 int main(int argc, char *argv[], char *envp[]) {
3    std::cout << "hello world" << std::endl;
4 }
5 \end{lstlisting}</pre>
```

5 Mathematics

5.1 Vectors

\vec Vectors notation. Aliases: \v, \vc. If the option arrowec described in §2 is enabled, the notation with a small arrow over the varible will be used \vec{x} , otherwise the vector is bold \vec{x} . Takes one option $\{\langle letter \rangle\}$. \v is renamed to \vaccent and \vec to \oldvec.

```
\mathbf{F} = m\mathbf{a} 1 \[ \vec{F} = m\vec{a} \]
```

\uvecure Unit vector notation. Alias \uv. Takes $\{\langle letter \rangle\}$. It is implemented in terms of \vec, which means that the style is inherited.

$$\hat{\mathbf{x}} = \mathbf{x}/x$$
 1 \[\uvec{x} = \vec{x}/x \]

5.1.1 Products

\dotp Dot product between vectors.

$$\mathbf{u} \cdot \mathbf{v}$$
 1 \[\vec{u}\dotp\vec{v} \]

\crossp Cross product between vectors.

$$\mathbf{u} \times \mathbf{v}$$
 1 \[\vec{u}\crossp\vec{v} \]

5.2 Matrices

\mx Matrix notation. Takes $\{\langle letter \rangle\}$.

$$\mathbf{J} = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix} & \begin{cases} 1 & \mathbb{Z} \\ 2 & \text{mx} \{J\} = \text{begin} \{pmatrix} \\ 3 & 0 & 1 & \mathbb{Z} \\ 4 & 1 & 0 \\ 5 & \text{end} \{pmatrix} \} \\ 6 & \mathbb{Z} \end{cases}$$

5.3 Equalities

\heq L'Hôpital limit equality symbol.

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$
1 \[
2 \lim_{x\to\infty} \frac{x}{x^2-1} \]
3 \quad \heq \lim_{x\to\infty} \frac{1}{2x}
4 \quad = 0
5 \]

5.4 Derivatives

5.4.1 Differentials

\dd The differential element. It needs a $\{\langle var \rangle\}$ and has the optional argument $[\langle order \rangle]$.

$$\mathrm{d}x$$
 d^4x 1 \[\dd{x} \qquad \dd[4]{x} \]

\di This is the same as \dd but with a small space in front, it is intended to be used in integrals for a nicer typesetting.

$$I = \int \mathbf{J} \cdot d\mathbf{s}$$
$$= \iint \mathbf{J} \cdot \hat{\mathbf{n}} \, dx \, dy$$

```
1 \begin{align*}
2         I &= \int \vec{J}\dotp\dd{\vec{s}} \\
3         &= \int \vec{J}\dotp\uvec{n}\di{x}\di{y}
4 \end{align*}
```

5.4.2 Scalar functions

\deriv The derivative has arguments $\{\langle function \rangle\}$, $\{\langle var \rangle\}$ and the optional argument $[\langle order \rangle]$.

\pderiv The partial derivative has arguments $\{\langle function \rangle\}$, $\{\langle var \rangle\}$ and the optional argument $[\langle order \rangle]$.

$$\begin{array}{ccc} \frac{\partial y}{\partial x} & \frac{\partial^3 y}{\partial x^3} & \begin{array}{ccc} & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & \\ & & & \\ & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \hspace{0.2cm} \begin{array}{cccc} & & \\ & & \\ \end{array} \hspace{0.2cm} \hspace{0.2cm} \begin{array}{cccc} & & \\ \end{array} \hspace{0.2cm} \hspace{0.2cm} \begin{array}{cccc} & & \\ \end{array} \hspace{0.2cm} \hspace$$

5.4.3 Vector functions

\grad The gradient vector operator.

$$oldsymbol{
abla} f$$
 1 \[\grad f \]

\div The divergence operator, \div is renamed to \divsymb. If the option donotrenew is used \divg is also available.

$$abla \cdot \mathbf{f}$$
 1 \[\div \vec{f} \]

\curl The curl operator.

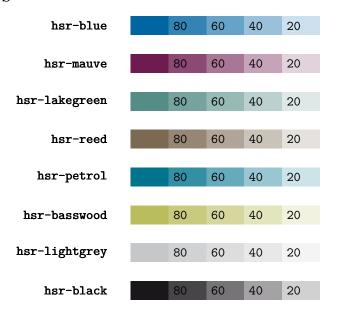

\laplacian The laplacian operator.

$$abla^2 f$$
 $abla^1 \setminus [$ 2 \laplacian f $3 \setminus]$

\vlaplacian The vector laplacian operator operator.
